

Noah Michaels

UX ENGINEER

Raleigh, NC 27603 — 919-376-6669 — hi@nm.works — nm.works — github.com/noahzm

SELECTED UX WORK

Wheely Weather — Native iOS cycling weather app 2025

wheelyweather.app — Swift, SwiftUI — Astro, React, TypeScript

- Shipped a native iOS cycling weather app that answers "ride now or wait?" with a verdict-first UI, hourly windows, and kit guidance (Swift, SwiftUI; informal cyclist validation).
- Built shared forecast logic in WheelyCore with accessibility-aware UI; web app on Cloudflare Pages; watchOS companion in progress.

EXPERIENCE

Print Production Designer, NC General Assembly — Raleigh, NC 2021–Present

- Standardized repeat-order stationery for 170+ legislators with template systems for cards, letterhead, and envelopes, reducing rework and correction rounds per print-shop feedback.
- Reworked information architecture and layout of data-heavy legislative publications for easier navigation and accurate production.
- Designed stationery order forms and clarified the internal print-shop ordering workflow so legislator and staff requests arrive with complete specs and fewer back-and-forth correction rounds.
- Replaced a two-step mailing process by data-merging letters directly onto letterhead, so a full mailing prints in one run instead of two.

Web & Graphic Designer, Creative Printing — Boone, NC 2018–2020

- Redesigned online ordering around customer jobs-to-be-done with a responsive category grid and intake forms, validated with the shop owner before launch.
- Designed and built 20+ responsive WordPress sites from wireframes through client revisions.

EDUCATION

Appalachian State University 2020

B.S., Graphic Arts and Imaging Technology, Cross Media Production — Minor: General Business

SKILLS

Design: user flows, information architecture, wireframing, prototyping, design systems, accessibility-aware design, typography, layout, brand and print production — Figma, Adobe Creative Cloud

Engineering: Swift, SwiftUI, React, TypeScript, Astro, Tailwind CSS, HTML/CSS — Git, GitHub, Cloudflare Pages — Cursor, Claude Code, Codex, OpenCode (agentic design-to-production)
