SUMMARY

Designer and developer who connects design to finished output. Five years spanning the whole pipeline: designs in Figma and the Adobe suite, builds front-ends in HTML, CSS, JavaScript, and Astro (plus a native SwiftUI app), and knows how the work gets produced, from variable-data systems to prepress and high-volume print. The constant is owning a project end to end, from concept to the thing people use.

SKILLS

- **Design & front-end:** Figma, Adobe Creative Cloud (InDesign, Illustrator, Photoshop), typography, brand & template systems | HTML, CSS, JavaScript, Astro, WordPress, Drupal
- **Also builds:** Swift & SwiftUI (iOS, watchOS) | Python scripting | Git | Linux/Unix CLI
- **Production depth:** EFI Fiery Command WorkStation | Variable data (VDP) & mail merge | Imposition & pre-flight | Multi-vendor fleets (Konica Minolta, Canon, Ricoh, Xante)

PROJECTS

Wheely Weather Native iOS & watchOS app · Swift / SwiftUI · in development github.com/noahzm/wheely-weather

- Tells cyclists whether to ride now, ride in mixed conditions, or skip the day, using Open-Meteo forecast and air-quality data, Nominatim geocoding, and National Weather Service alerts.
- Built on a shared, unit-tested Swift core (WheelyCore) that drives the ride verdicts and feeds a companion Apple Watch glance showing wind, rain, alerts, and the next good riding window.

EXPERIENCE

North Carolina General Assembly Print Shop

Raleigh, NC

Print & Digital Production (Printing Clerk II)

2021 – Present

- **Internal tooling:** Built a web calculator that finds the optimal number of presses to split a job across, modeling each machine's rate (four at 136 impressions/min, one at 120) to stop at the point where adding another printer would save only seconds, so operators avoid over-splitting jobs for marginal gains.
- **Variable data:** Wrote a data-merge that combines base stationery with per-recipient address and body content in a single pass, eliminating a second trip through the press on personalized runs serving all 170 members of the General Assembly.
- **Production:** Run high-volume output (tens of thousands of impressions weekly during legislative session), handling imposition, pre-flight, and color setup.
- **Technical support:** Only member of the seven-person shop who troubleshoots IT: resolve RIP, font-rendering, driver, and connectivity failures that would otherwise halt production.
- **Design:** Designed the official identity seal and branding for the NCGA's America 250 (Semiquincentennial) Committee.

Creative Printing and Internet Services

Boone, NC

Web Developer (full-time & part-time)

May 2018 – Dec 2020

- **Web:** Built and maintained 20+ responsive WordPress and Drupal sites: theming with Elementor and GeneratePress, layout, and ongoing client updates.
- **Maintenance:** Handled remote upkeep across client sites, including database maintenance, security patching, and plugin updates.
- **Prepress:** Ran RIP and prepress for commercial print clients on EFI Fiery Command WorkStation: color management, job ticketing, and print-ready file prep.

Maintenance Contractor

Dec 2020 – Present

- Ongoing maintenance retainer for the client sites built during the full-time engagement.

EDUCATION

Appalachian State University

Boone, NC

B.S., Graphic Arts & Imaging Technology

2020

- **Concentration:** Cross Media Production | Minor: General Business | Dean's List (4 semesters)
- **Relevant coursework:** Web Development for Graphic Communications (intro & advanced), Digital Printing Systems, Cross Media Production, Electronic Document Design I & II, Job Estimating & Planning, Computer Science I, Discrete Mathematics.
