

# Noah Michaels

UX ENGINEER

Raleigh, NC 27603 · 919-376-6669 · hi@nm.works · nm.works · github.com/noahzm

---

## PROFILE

---

UX engineer who designs in code across iOS and web. Six years making legislative template systems, print-shop ordering, and a cycling weather app that turns forecasts into a plain ride verdict. Uses AI-assisted coding tools daily for faster iteration; product and accessibility decisions stay author-led.

## SELECTED PRODUCT WORK

---

**Wheely Weather** · Native iOS cycling weather app 2025

*wheelyweather.app · Swift, SwiftUI · Astro, React, TypeScript*

- Designed and shipped a native iOS app that answers the question cyclists actually have (ride now, or wait?), with verdict-first UI, hourly windows, best-day picks, and kit guidance.
- Validated the product model through informal conversations with cyclists; shared forecast logic lives in WheelyCore with accessibility-aware UI.
- Earlier web version on Cloudflare Pages; watchOS companion via WatchConnectivity. App Store submission in progress.

*Full case studies at nm.works/projects*

## EXPERIENCE

---

**Graphic & Production Designer**, NC General Assembly · Raleigh, NC 2021–Present

- Built template systems for the cards, postcards, letterhead, and envelopes that 170+ legislators order on repeat, reducing rework so each job starts from a standard instead of a blank page.
- Replaced a two-step mailing process by data-merging letters directly onto letterhead, so a full mailing prints in one run instead of two.
- Reworked the structure and layout of data-heavy legislative publications so they're easier to read, navigate, and produce accurately.

**Web & Graphic Designer**, Creative Printing · Boone, NC 2018–2020

- Redesigned online ordering around the jobs customers came to do, with a clearer path from picking a service to submitting the work.
- Designed and built 20+ WordPress sites, working directly with clients from first wireframes through scoping and rounds of revisions.

## EDUCATION

---

**Appalachian State University** 2020

B.S., Graphic Arts and Imaging Technology, Cross Media Production · Minor: General Business

## SKILLS

---

**Product & UX Design:** user flows, information architecture, wireframing, prototyping, design systems, accessibility-aware design · Figma

**Front-End Development:** Swift, SwiftUI, React, TypeScript, Astro, Tailwind CSS, HTML/CSS · Git, GitHub, Cloudflare Pages

**AI-Assisted Development:** Cursor, Claude Code, Codex, OpenCode — agentic design-to-production workflow

**Visual Design:** typography, layout, brand and print production · Adobe Creative Cloud
